Nikos Lefakis

Full-Stack Software Engineer · Applied AI

Heraklion, Crete · +30 698 670 2647 · lefnick@gmail.com · LinkedIn · GitHub · Portfolio

SUMMARY

Full-stack developer (BSc Computer Science, University of Crete) who builds and ships web products with TypeScript, React/Next.js, Node.js/NestJS and PostgreSQL: two internal systems deployed for a travel agency, an AI document Q&A app with verifiable sources, and a subscription SaaS with Stripe billing. Currently an independent contractor at Dinami.AI, implementing features, testing web and mobile applications and building landing pages. Looking for a remote or hybrid full-stack role.

WORK EXPERIENCE

Junior Developer (Independent Contractor) — Dinami.AI *Jul 2026 – Present*

Heraklion, Crete (Remote) · dinami.ai

- **Building features and improvements** on both the frontend and the backend of web applications for the company's AI automation and custom software projects, including systems with AI agents (Python, LangChain).
- **Performing manual QA testing** on web and mobile (iOS) applications and AI-powered tools — user flows and edge cases before release — and writing end-to-end tests with Playwright (with AI-assisted tooling).
- **Building and improving** responsive, client-ready landing pages and websites using AI-assisted development workflows.

EDUCATION

University of Crete — BSc in Computer Science *2020 – 2025*

Department of Computer Science · Heraklion, Crete · Degree Grade: 7.5 / 10

- **Thesis:** LensHub — Full-Stack Platform for Photography Equipment Exchange with Stolen Equipment Detection System (React.js, PHP, MySQL, Docker) · GitHub Repo

PROJECTS

Internal Systems for a Travel Agency (client project, 2 systems) *2026*

- Built two systems deployed on the client's on-premise Windows server: a **booking and supplier-management system** for excursions (bookings, payments, supplier capacity and pricing, audit log, real-time updates) and a **CRM** (contacts, companies, reminders, email outbox with retries, automations, role-based access).
- Added authentication, backups with restore tests, and rollback. **Stack:** Node.js/Express, React/Vite, NestJS, Next.js, Prisma, PostgreSQL, Vitest.

Docveo — AI Document Q&A (RAG) *2026*

- Chat with PDFs with checkable sources: page-aware chunking, Gemini embeddings, pgvector search, streaming answers (Groq) and OCR fallback. The server verifies each citation against the retrieved passages and shows only verified sources (file, page, passage). · Live · Code on request
- Evaluation harness (84 synthetic questions), input validation, rate limits, prompt-injection tests. **Stack:** Next.js 16, TypeScript, Supabase (pgvector), Tailwind CSS, Vitest, GitHub Actions, Vercel.

FormaRep — Full-Stack SaaS Fitness Platform *2026*

- SaaS platform with AI workout and meal planning (Gemini), Stripe subscriptions, nutrition and macro tracking, and a gym-to-member program assignment system. · Live · Code on request
- **Stack:** Next.js 16, TypeScript, Prisma, PostgreSQL, Clerk, Stripe, Gemini API, Resend, Tailwind CSS v4, Vercel.

Apodix — Checking AI-Agent Work (open source) *2026*

- Python tool (MIT) that checks whether an AI agent's "done" is backed by tests: it deliberately breaks the code the tests run and reports each acceptance criterion as proven, unproven or missing. It works on temporary copies, so the real code is never changed. · GitHub

E-Library Web Platform *2023*

- Role-based e-library (admin, librarian, student, visitor) with REST APIs and map integration (university course project). · GitHub

SKILLS

- **AI:** RAG, LangChain, LlamaIndex, OpenAI / Gemini / Groq APIs, pgvector, AI agents, prompt engineering
- **Languages:** TypeScript, JavaScript, Python, Java, PHP, C/C++
- **Web:** React, Next.js (App Router), NestJS, Node.js, Express, REST APIs, Prisma, Tailwind CSS
- **Data & DevOps:** PostgreSQL, Supabase, MySQL, Docker, Git, GitHub Actions, Vercel
- **Testing:** Vitest, Playwright (AI-assisted)

VOLUNTEERING & MILITARY SERVICE

iGEM uniCRETE — Dry Lab Member *Nov 2022 – Oct 2023*

- Designed and developed the official team website for an international synthetic biology competition team · 2023.igem.wiki/unicrete

Hellenic Armed Forces — Secretary Specialist (service fulfilled) *2025 – 2026*

- Processed military documentation and maintained personnel records in the ESEP system.

CERTIFICATIONS

- **Microsoft Azure Essentials** · **AI Fluency & Claude 101** (Anthropic) · **Google Generative AI Fundamentals** · **Prompt Engineering for Developers, LangChain for LLM Development, Building Agentic RAG with LlamaIndex** (DeepLearning.AI) — 2026
